

Pycharm / IntelliJ / Webstorm Wakatime 9.3.3 Installation

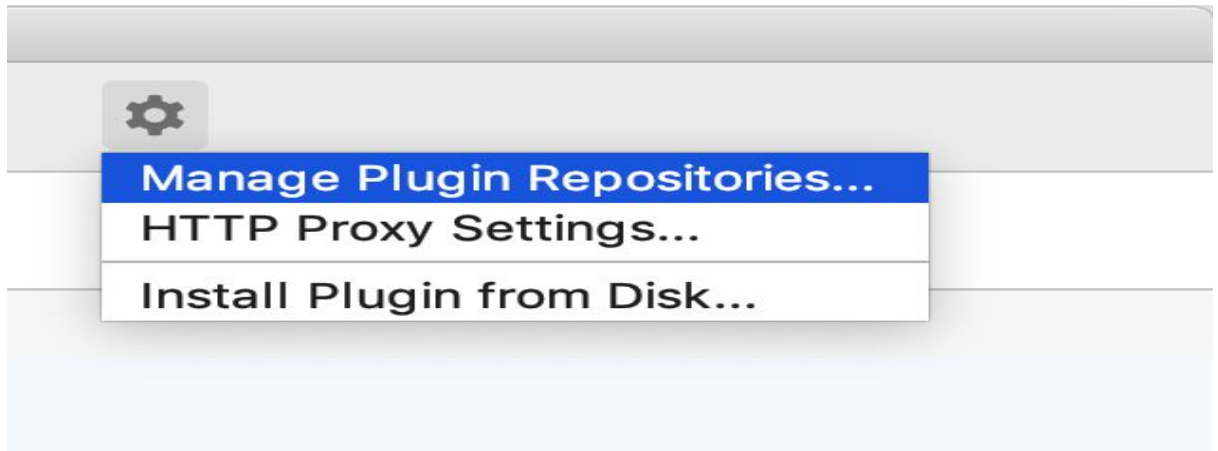

1. Go to <https://plugins.jetbrains.com/plugin/7425-wakatime/versions>
2. Download version 9.3.3(It would be a file name 'wakatime.jar' stored)
3. Go to IDE preferences

4. Search and click on plugins

5. Click on the icon as shown in the following image(it looks like settings icon)

6. Click on 'Install plugin from disk'
7. Upload the waketime.jar file downloaded in step 1,2
8. Restart your IDE
9. Code for 1-2 minutes(To give the plugin some data to start working)
10. Check if a the following directory is created
- C:/Users/<bo username>/AppData/Roaming/WakaTime/waketime-master/
11. If 10 is True, proceed with further steps
12. If there is no directory as asked in 10, contact Gaurav.
